

GAIN EFFICIENCY, CHANGE LESS

Keep your HVAC system performing at its best with our easy-to-follow filter checklist. Ensure you have the right filters for top air quality and efficiency.

- Check MERV Rating:** Does it meet your air quality needs? Will it effectively filter out the contaminants you are concerned with?
- Fit and Compatibility:** Are the filters the correct size and compatible with your system?
- Airflow Impact:** Is the pressure drop within acceptable limits for your HVAC system?
- Material and Construction:** Are the filters made from appropriate materials for your environment?
- Replacement Frequency:** Are you replacing filters according to an appropriate schedule?
